

ENERGYPAC'S G-GAS,

Emerges as the newest vehicle for socio-economic development.

The modern world's favorite fuel, LPG, is playing a crucial role in meeting the growing demand for fuel in Bangladesh. In continuation to this step, Energypac - one of the leading companies in the power and energy sector of Bangladesh, has brought G-Gas to the market with the confidence to meet the growing demand for fuel with the latest European technology.

G-Gas promises uninterrupted LPG supply for Households, hotels, restaurants and industrial establishments alike. In order to sustainably keep this promise, Khulna's only LPG industry has established a well-extended distribution network. With 12 distribution hubs and over 300 dealers/distributors nation-wide, G-Gas will provide LPG services to the doorstep of every customer.

Through the LPG storage with initial 3000 metric tons of capacity in Dacope Sub-district of Khulna, and with provision of 2000 metric tons capacity extension is under construction.

To meet the growing demand of households and to assure customer service, G-Gas has initially started with 5,00,000 number of cylinders. Aside from that, at their own establishment G-Gas has built consolidated factories with the monthly production capacity of over 1,00,000.

Meanwhile, G-Gas aims to play a crucial role in the extensive social and economical growth of Bangladesh, along with the development of **socioeconomic** of Khulna region and the life of the mass. Dacope sub-district of Khulna has become economically active; a change has occurred to the financial situations of the people by opening scopes for employment.

To optimize the efforts of meeting the country's increasing energy demand, Energypac is using world class technology to manufacture its cylinders and Bottling, which has been installed under the expert supervision of ROKTEK from Turkey and France's Sigara. To further ensure the complete safety of consumers, each cylinder will be manufactured complying American Standard specifications standards, with a certain thickness that helps provide the optimal levels of safety.

From the production of Gas up until its delivery to the consumers' doorsteps, international policies and the policies of Bangladesh's Department of Explosives are adhered to at every level.

Staying true to the slogan, "Stay Well, Keep Well", G-Gas is reaching out to the regular people at even the most remote corners of the country with solutions to improve their overall standards of living, and with an endeavor to establish itself as their life-long partner in a healthy, beautiful and safe way of life.
